

KEDOCOL BC

ADHESIVE FOR ASSEMBLING CELLULAR CONCRETE BLOCKS

TECHNICAL DEFINITION

Powder adhesive for indoor and outdoor assembly of cellular concrete block partitions.

Also suitable for smoothing cellular concrete blocks.

COMPOSITION AND APPEARANCE

White cement, sand and various additives.

The resulting mix is white.

ACCEPTED SUBSTRATES

All types of cellular concrete.

TECHNICAL CHARACTERISTICS

- Setting time: 5 hours.

- Adjustable for 15 to 20 min.

PACKING

25 kg bags.

STORAGE

6 months in unopened original packing protected from damp.

APPLICATION

PRECAUTIONS FOR USE

The temperature during application and drying must be between 5 and 30°C.

Do not use mix that has begun to set.

Product labelled as hazardous. Contains cement: gloves should be worn. Refer to the safety label on the packaging. Observe the precautions for use and the safety advice. Safety data sheet available at www.quickfds.com, read before use.

PREPARATION OF SURFACES

The cellular concrete blocks must be dry and free of dust.

MIXING FACTOR

Around 8 to 9 l of water per 25 kg sack.

Mechanical mixing is preferable.

APPLICATION

Application is to be carried out using a toothed spatula to apply a quantity of adhesive equivalent to a joint thickness of 2 to 3 mm.

CONSUMPTION

- Approximately 5 kg/m² for assembly.

- Approximately 2 kg/m² for finishing.

DRYING TIME

12 to 24 hours depending on the ambient conditions.

CELLULAR CONCRETE ADHESIVE

This is the ideal adhesive for the fast assembly of cellular concrete blocks.

KEDOCOL BC is also suitable for smoothing walls and partitions of cellular concrete.

ADVANTAGES

- Fast setting.
- General-purpose suitability for assembly and finishing.

APPLICATION TIP

Use KEDOCOL BC also for filling jobs by mixing 2 parts of adhesive with 1 part of 0-2 mm grade sand.
